"LITTLE TREES AT LITTLE PRICES FOR EVERY PURPOSE" from Little Tree Farms

I Colorado Blue Spruce adding cheerfulness to the landscape.
Our Little Trees will do this for your lawn or roadside
in a few years.

II A Little Tree Farms' Colorado Blue Spruce
Sturdy and Healthy

III A block of Colorado Blue Spruce at Little Tree Farms
All Little Tree Farms' trees are American-born and American-grown and therefore are best for
American Landscapes and American Conditions.

Illustration No. I

Are your home grounds *bare looking*? Do you realize how much a few trees will "brighten up" your surroundings and add to your joy of living? A small outlay now will increase the value of your property hundreds of dollars in a few years. Study our prices and you will be surprised for how little you can beautify your landscape.

Illustration No. II

Little Tree Farms' trees have masses of fine feeding roots, necessary for successful growth. Our little trees are full of vigor and become rapid-growing, long-lived trees. Your order will be filled with "full of life little trees that grow."

Illustration No. III

The plants at Little Tree Farms are kept free from weeds, disease and insect pests. These trees are grown naturally — not forced with chemical fertilizers. They will thrive and live long on your land. Right now millions of them are thriving on thousands of properties throughout the United States.

COLORADO BLUE SPRUCE

Picea Pungens

Colorado Blue Spruce is a very popular ornamental tree, and its striking symmetry and peculiar pleasing color make a very strong appeal where especial effects are desired. It is the bluest of the white or blue spruces, and is highly valued as an ornamental specimen. This spruce gives a rare tint in color combinations, especially in contrast with the darker evergreens. One of the hardiest of all the spruces. We sell our Blue Spruces "nursery run." By this we mean none of the bluest ones have been picked out.

"BIG TREES FROM LITTLE ONES IN A FEW YEARS" *from Little Tree Farms*

A naturalistic planting of Junipers. Standing like sentinels ever on guard over the surrounding hills and lake.

**For color, symmetry, and architectural suggestiveness of line,
no ornamental tree is superior to the Juniper.**

JUNIPER: SAVIN: RED CEDAR. *Juniperus Virginiana*.

The Juniper is a tree of ever increasing popularity. It does well in direct sunshine even on poor soils. Where formality of line is desired plant singly; for naturalistic effects set in groups. It is also used for garden borders. It makes a valuable windbreak and is often planted for the attraction of birds. Junipers are very readily and successfully transplanted if they have a well developed, compact root system such as is grown at *Little Tree Farms*.

		each	10	100
5 to 6 ft. high	Three Times	\$4.00	\$35.00	\$300.00
4 to 5 ft. high	Transplanted	2.50	20.00	150.00
3 to 4 ft. high	and	2.00	16.00	110.00
2 to 3 ft. high	Root Pruned	1.75	14.00	95.00

Junipers should be dug with a ball of earth and wrapped in burlap. Our prices include this service, also boxing and delivery to the transportation company.

JUNIPER 5½ ft. tall

A typical *Little Tree Farms*' product. Straight, well rooted and hardy. We have thousands from 2 to 6 feet tall.

The 5½ ft. trees cost

\$3.00 each for 50 or more trees.

\$3.50 each for 5 to 50 trees.

\$4.00 each for less than 5 trees.

THIS IS THE BIGGEST BARGAIN *from* Little Tree Farms

A Group of White Pines
on the lawn of a country home near Boston.

We grow three qualities of White Pines, all good and suitable for their respective uses. Transplanting and root-pruning produce good tops and an abundance of fibrous feeding roots. Our trees having had this treatment grow faster and are more enduring than trees that have not been so treated.

WHITE PINE

is New England's Fastest Growing and
Choicest Evergreen

IT GROWS EVERYWHERE

and is planted for every purpose—
Beauty, Utility, Profit

On Lawns and on country estates specimen White Pine trees are set singly and in groups for home decoration and landscape pictures.

Mass Plantings of White Pine are made to screen out adjoining buildings and to form backgrounds and a fitting sky line for the garden.

Hedges and Tall Windbreaks of White Pine are planted to protect the flower and vegetable gardens, to shelter orchards and field crops, buildings and cattle, conserving heat, fuel and feed.

Along Roads and Drives White Pine plantings are made for protection from cold winds and snow in winter and for shade and coolness in summer. Bordering public highways they also afford seclusion and break the dust and noise.

For Reforesting: White Pine is the foremost tree used profitably to reforest—without cultivation, or fertilization,—idle, exhausted or unprofitable lands. Lumber is in world demand—Do your bit—Use our low-priced little trees.

We have shipped millions of our hardy, well-rooted White Pines to many thousands of our customers and they are thriving beautifully.

They flourish in sunshine or in partial shade, on light dry soils or on moist ones, as no other evergreen does.

We do not ship White Pine outside of New England

A 6½ ft. Selected White Pine
Grown from seed at Little Tree Farms

Three-times-transplanted and root-pruned (selected) trees

Our best in roots and tops. For single specimens and group plantings.

"EVERGREENS FOR BORDERS, BREAKS, SCREENS" from Little Tree Farms

I. and II.—Evergreen "Border" Planting; also effective as "Screen" Planting.

I.—EVERGREEN "BORDER" PLANTING

Thirty Feet Long, Properly Thick, Only \$14.00

WHERE your lawn comes to an edge by the busy sidewalk, or at the dividing line between your property and your neighbor's, shut in a pleasant space with this Border Planting. In another spring you can set flowering shrubs against the green background, and plant early bulbs in the open spaces.

Beautiful evergreen planting about the home lengthens the season of outdoor play. Plant the trees in an irregular, natural manner about six feet apart, placing the pines in the background and the spruces in the foreground.

12 Red Pine, . . . twice-transplanted, 2 to 3 feet tall

AND

13 Douglas Spruce, twice-transplanted, 1½ to 2 feet tall

25 Trees for Only \$14.00

II.—EVERGREEN "SCREEN"

For Garage or Limited Service Area

\$4.20 will Screen Twenty Feet

YOU don't want to see your garage, stable or laundry yard every time you look out the rear windows. Something of nature's carpentry is pleasanter to the eye. Why not screen off those service areas with a mass of living green, beautiful all the year round? An "Evergreen" planting is beautiful to look at, summer and winter. For ordinary screening, plant the trees about five

III.—"Break" Planting against Wind—Snow—Dust and Noise.

feet apart, a few feet from the building, not in rows but in an irregular, natural-looking group, about two rows thick.

12 Arborvitae, . . . once-transplanted, 1½ to 2 feet tall, for only \$4.20

OR

10 Hemlock, three-times transplanted, 2 to 3 feet tall, for only \$9.00

III.—EVERGREENS FOR "BREAKS"

Wind—Snow—Dust and Noise

Sixty Feet Long, Properly Thick, for Only \$17.00

PROTECTION from wind, snow, dust and noise adds the culminating touch of restfulness to your property. Evergreens not only shut out wind, snow, dust and noise, but they hold the heat. They are of the greatest value around buildings, gardens, orchards and cultivated fields.

In making windbreaks it does not follow that they must be continuous from end to end of a field, but it is important that they shall run in certain directions. It is important that they shall be made up primarily of species of trees that will grow fast and in some cases tall. Both the Red Pine and Douglas Spruce grow rapidly. The pines will grow to a great height and the spruces, retaining their lower branches densely, will furnish the necessary protection for the under portion of the break.

15 Red Pine, . . . twice-transplanted, 2 to 3 feet tall

AND

15 Douglas Spruce, twice-transplanted, 1½ to 2 feet tall

30 Trees for Only \$17.00

"START A LITTLE TREE GARDEN" WITH TREES *from* Little Tree Farms

A Little Tree Garden

Be Forehanded—Save Money

Buy little trees now,—plant them out for borders and edging for your vegetable garden, also in rows like vegetables and flowers. Employ the Little Tree Garden idea and set the trees out without additional labor; they will require practically no care; they will add beauty and charm to your vegetable plot, and they will be increasing in size and value all the time. It's *real* economy and pleasure.

With a Little Tree Garden on your land it is always planting season with you.

How many times while walking about your estate have you thought "A little blue spruce would 'brighten up' this corner," or "A few shade trees right here would be just the place to swing a hammock this hot day," or "I wish that objectionable view on my neighbor's property was screened from sight," or "A mass planting of Japanese Barberry with its bright red berries would be cheerful in the fall and early winter," or "A privet hedge is just what I need on the front of my property," etc.? With a Little Tree Garden you can carry out these small plantings with your own stock when the spirit moves.

Sample Bargain Combination for Little Tree Garden

52 PLANTS FOR \$18.00

This combination is comprised of eleven very desirable species for American planting—all American-born and American-grown. Below are listed the varieties, sizes and quantities of each that make up the combination.

5 Silver (Concolor) Fir.....	1½	to 2	feet tall
2 Juniper; Red Cedar	2	to 3	feet tall
5 White Spruce.....	1	to 1½	feet tall
5 Blue (Colorado) Spruce.....	1	to 1½	feet tall
5 Red (Norway) Pine.....	1	to 1½	feet tall
5 Douglas Spruce (Fir)	1	to 1½	feet tall
5 Arborvitae (White Cedar).....	1	to 1½	feet tall

"BIRTHPLACE OF LITTLE TREES THAT LIVE"—Little Tree Farms

A Little Tree Farms' Silver (Concolor) Fir.

Silver Fir is one of the hardiest evergreens; withstands heat and drought in summer and the rigors of New England winters. It does well in moist soils. It is a rapid grower and develops naturally into a beautiful, shapely silver-green tree. It retains its lower branches. Silver Fir is best suited for decorative planting as an individual specimen tree, for small group planting or for color contrast with darker evergreen backgrounds. Should be planted in the light. Our complete prices of Silver Fir on third column of this page.

In the foreground is a block of Silver Firs at Little Tree Farms. Beyond, covering many acres, blocks of other evergreens can be seen.

Write for our prices on stock not listed. We grow many other kinds of evergreen trees and shrubs.

BALSAM FIR

Once Transplanted.....4 to 8 in.	2.50	20.00	170.00

Ground Juniper: It varies from a prostrate plant to plants three feet in height, often spreading fifteen feet. Its dense foliage has a grayish-green color. It grows naturally on sandy and gravelly hillsides in full sunlight and is able to withstand severe winds. Has little black berries attractive to birds. *Juniperus Communis* makes an admirable entrance gate plant where an unobstructed view is desired. Valuable in rockeries and as a ground cover.

Once Transplanted.....8 to 12 in.		6.00

Description of White Spruce top of next column.

SPRUCES—Continued

White Spruce is one of the best spruces; it is a rapid grower and extremely hardy, adapting itself to both wet and dry soils, withstands salt air, exposure and snow and ice pressure. It is pyramidal in form and has beautiful silver-green foliage. It is planted extensively along the coast and where there is much windsweeping. White Spruce makes good windbreaks, screens, groves and specimen trees. It is used extensively for hedge planting.

Height	Prices in Lots of		
	10	100	1000
<i>Picea Engelmanni</i>			
Once Transplanted.....8 to 12 in.	\$1.00	\$7.00	\$60.00
Once Transplanted.....4 to 8 in.		4.50	35.00
Seedling.....3 to 5 in.		1.75	12.00

NORWAY SPRUCE

Picea Excelsa

Twice Transplanted.....3 to 4 ft.	\$6.50	\$40.00
Twice Transplanted.....2 to 3 ft.	5.00	32.00

Twice Transplanted.....8 to 12 in.	1.50	7.00
Once Transplanted.....1 to 1½ ft.	1.50	8.00

The Red Spruce is the native spruce of the north woods, and extends over a wide range of soils and conditions. It is the important spruce so much used for lumber, construction timber, and paper pulp. It is a persistent grower and deserves far more general use in ornamental planting than it has yet attained. The beautiful contrast, yet harmonious blending, of the warm, dark green of the Red Spruce and the silvery color of the White Spruce should be brought out on many more northern estates.

A Group Planting of Douglas Spruce

Douglas Spruce is one of the most majestic trees of North America and has found favor wherever introduced here and in Europe. It is one of the fastest growing of the conifers, yet endures to old age and large size, growing from 75 to 150 feet high. It accommodates itself to many soils, succeeding on dry, slaty soils and sandy ones, and in direct exposure to the fiercest winds and to salt spray. It grows well in shade. Douglas Spruce wood is valuable.

"AMERICAN-BORN AND AMERICAN-GROWN TREES" from Little Tree Farms

A Little Tree Farms' Red Pine, 2½ ft. tall.

Formerly a barren sand bank. Transformed by a mass planting of Red Pine

Red or Norway Pine is one of the most valuable native trees for general planting. It withstands salt air and spray as few other trees do. It grows where grass and other agricultural crops are not profitable. It is picturesque even on poor soils, and on richer soils it has a vigorous and superb growth of long, deep-green needles. The wood of this species is valuable and is being more appreciated every year.

Its comparative freedom from insect and fungous enemies is a very valuable characteristic of the Red Pine.

RED OR NORWAY PINE

Pinus Resinosa

Height	Prices in Lots of		
	10	100	1000
Twice Transplanted . . . 2 to 3 ft.	\$7.00	\$50.00	\$450.00
Twice Transplanted . . . 1½ to 2 ft.	5.00	30.00	250.00
Twice Transplanted . . . 1 to 1½ ft.	4.00	23.00	200.00
Once Transplanted . . . 2 to 3 ft.	4.00	25.00	200.00
Once Transplanted . . . 1½ to 2 ft.	3.00	16.00	125.00
Once Transplanted . . . 1 to 1½ ft.	2.50	12.00	100.00
Once Transplanted . . . 8 to 12 in.	1.50	7.00	50.00

AUSTRIAN PINE

Pinus Austriaca

Height	Prices in Lots of		
	10	100	1000
Once Transplanted 1½ to 2 ft.	\$2.75	\$15.00	\$140.00
Once Transplanted 1 to 1½ ft.	2.00	10.00	85.00
Once Transplanted 8 to 12 in.	1.50	6.50	50.00

A very sturdy evergreen with long, deep-green needles. It grows to a height of about 40 ft. and attains this growth in a comparatively short time. It grows well on poor soils and is especially adapted for planting near the coast. It is used extensively as an ornamental tree, and the color of the foliage is particularly effective in contrast with other pines.

JAPANESE RED PINE

Pinus Densiflora

Height	Prices in Lots of		
	10	100	1000
Once Transplanted 3 to 3½ ft.	\$8.50	\$50.00	
Once Transplanted 2 to 3 ft.	6.00	35.00	
Once Transplanted 1½ to 2 ft.	4.00	20.00	\$175.00
Once Transplanted 1 to 1½ ft.	3.00	15.00	130.00

A Japanese plant particularly hardy here. Resembles somewhat our native Red Pine, except that the long, slender needles are more yellowish-green. This tree is very effective either in mass plantings or as an ornamental lawn tree. Grows rapidly.

All prices in this booklet include careful packing and delivery to the transportation company at Framingham, Mass.

"TREES GROWN NATURALLY, NOT FORCED" at Little Tree Farms

PINES

BANK'S PINE

Pinus Divaricata

	Height	Prices in Lots of		
		10	100	1000
Twice Transplanted	5 to 8 ft.	\$9.00	\$60.00	
Twice Transplanted	4 to 6 ft.	6.50	40.00	

Bank's Pine is called the "poplar of the evergreens" because of its rapid growth, and should be used where immediate results are desired. Like poplars, however, in screen and mass plantings they should be set with slower-growing, dense foliaged species.

RED OR NORWAY PINE

Pinus Resinosa

Twice Transplanted	2 to 3 ft.	\$7.00	\$50.00	\$450.00
Twice Transplanted	1½ to 2 ft.	5.00	30.00	250.00

Once Transplanted.....	2 to 3 ft.	2.50	15.00	110.00
Once Transplanted.....	1 to 2 ft.	2.00	10.00	75.00

For illustration and uses of White Pine see page 3.

White Pine is the best and most favorably known of our American evergreens. It is "at home" wherever used. The White Pine can readily be identified by its silver-green needles three to four inches long in bundles of five. There is no other tree that adapts itself to so many soils or conditions and is so generally planted. It grows rapidly on moist and sandy soil but not too wet ones. It often makes as much as two or three feet of growth in a year. It does well in partial shade.

NOTE:—We do not ship Limber, Silver or White Pine outside of New England.

Little Tree Farms' Scotch Pine, 3½ ft. high.

SCOTCH PINE

Pinus Sylvestris

	Height	Prices in Lots of		
		10	100	1000
Twice Transplanted	6 to 9 ft.	\$12.00		
Twice Transplanted	4 to 6 ft.	8.00	\$75.00	
Twice Transplanted	3 to 4 ft.	6.00	45.00	
Twice Transplanted	2 to 2½ ft.	4.00	30.00	
Once Transplanted	2 to 3 ft.	2.75	18.00	
Once Transplanted	1½ to 2 ft.	2.00	10.00	\$90.00
Once Transplanted	1 to 1½ ft.	1.50	7.00	60.00

Scotch Pine is a vigorous tree with blue-green, short-needled foliage. It adapts itself to many soils and withstands strong winds. It is used extensively for windbreaks and shelter belts. It should not be planted in the shade.

All Prices in this booklet include packing and delivery to the transportation company at Framingham, Mass.

CANADIAN YEW

Taxus Canadensis

	Height	Prices in Lots of		
		10	100	1000

Seedling.....	3 to 4 ft.		5.00	\$35.00
Seedling.....	1½ to 2 ft.		3.50	20.00

Silver Maple: Most rapidly growing Maple. Foliage deeply cut light-green, silvery beneath. Especially recommended where immediate effects are desired; should not be used as a permanent tree for it soon reaches maturity and deteriorates rapidly. Plant permanent trees with it, removing the Silver Maples later on.

BOX ELDER

Acer Negundo

Three Times Transplanted	10 to 12 ft.	\$10.00		
Three Times Transplanted	7 to 10 ft.	6.50	\$50.00

MAPLES—Continued

RED MAPLE

Acer Rubrum

	Height	Prices in Lots of		
		10	100	1000
Twice Transplanted.....	8 to 12 ft.	\$7.00	\$55.00	
Twice Transplanted.....	7 to 9 ft.	6.00	40.00	
Twice Transplanted.....	5 to 7 ft.	5.00	30.00	
Once Transplanted.....	4 to 6 ft.	3.00	17.00	
Once Transplanted.....	3 to 4 ft.	2.25	14.50	

Red Maple: Much admired for its brilliant fall color. Habit graceful, making it desirable for specimen trees or park planting. Grows well in dry soils but has its best development in wet lands, even swamps, where very few other trees will grow.

SUGAR MAPLE

Acer Saccharum

Once Transplanted.....	5 to 7 ft.	\$5.00	\$40.00	\$350.00
Once Transplanted.....	4 to 6 ft.	4.50	34.00	310.00
Once Transplanted.....	3 to 4 ft.	2.75	20.00	150.00
Once Transplanted.....	2 to 3 ft.	2.25	15.00	125.00

Sugar Maple: The Sugar or Rock Maple is undoubtedly the best of the Maples for avenue, lawn or grove use. Its height, hardiness and fall color are its chief assets. Many people are planting this tree in groves as a source of maple sugar. It is remarkably free from insect attacks. We raise this tree in large quantities. Our low prices enable people to plant large groves of this tree.

CHESTNUT

HORSE CHESTNUT

Aesculus Glabra

Once Transplanted.....	3 to 4 ft.	\$4.00		
Once Transplanted.....	2 to 3 ft.	3.00		
Once Transplanted.....	8 to 12 in.	1.50	\$10.00	
Once Transplanted.....	4 to 8 in.		6.00	

Horse Chestnut is a distinctive ornamental tree and a great favorite. It makes a fine specimen tree for lawn or park, avenue or street planting. It has a compact, symmetrical, low-branched crown which furnishes dense shade. In spring it has beautiful, large, white, showy flowers, and its handsome dark green leaves appear very early; seven leaflets radiate from a common point. The tree is very hardy, enduring well the adverse conditions of the city,—smoke, poor soil and lack of moisture.

Little Tree Farms' Box Elder, 10 ft. high.
\$1.25 each; \$1.00 each for 10 or more.

See middle column of this page for extremely low prices of Box Elder.

Box Elder is a low-priced, fast growing tree and is used to good advantage where a mass of foliage is wanted quickly to hide out an ugly view. It grows very fast, often four or five feet in a season. It does not suffer from Scale, Borers and Blight like Poplars and consequently is preferable. Box Elder is a desirable filler tree in mass plantings and to plant with evergreens. Grows well in dry soils; is often used in retaining banks.

All prices in this booklet include packing and delivery to the transportation company at Framingham, Mass.

Little Tree Farms' Norway Maple, 7 ft. high. \$0.75 each; \$0.55 each for 10 or more.

See middle column of page 10 for complete prices of Norway Maple. Norway Maple is one of the choicest trees for specimen planting on lawns or along avenues. Particularly hardy; thriving along city streets where smoke, dust and drouth often kill out other trees. Has a low symmetrical top with beautiful, dense, deep-green foliage which turns a striking yellow in fall. Is a rapid grower. These Norway Maples are very stocky and will plant easily.

All prices in this booklet include careful packing and delivery to the transportation company at Framingham, Mass.

"ORDERS CAREFULLY PACKED AND PROMPTLY SHIPPED" from Little Tree Farms

Little Tree Farms' White Ash, 5 ft. high.
\$0.60 each.
\$0.40 each for 10 or more.

See first column of page 11 for complete prices of White Ash.

White Ash: True Eastern White Ash is one of our most valuable trees for ornamental and forestry uses. It thrives on lands too wet for most species and also does remarkably well on drier lands. For timber, shade and street planting, it is highly valuable. Grows fast and is not attacked by gypsy moths and many other insects. Large quantities of White Ash are being planted. We have well rooted, straight and vigorous trees.

OAKS

WHITE OAK

Quercus Alba

	Height	10	100	1000
Twice Transplanted.....	3 to 4 ft.	\$12.50	\$100.00	
Twice Transplanted.....	2 to 3 ft.	8.50	70.00	

White Oak: One of the finest specimen trees when planted in the open. Characterized by its short, massive, light-gray trunk, and by its stout, horizontal, far-reaching limbs—gnarled and twisted in old age. Forms a broad, open head of striking grandeur. Foliage turns a beautiful purple in fall. Grows well in all soils except wet ones. It requires sunlight—enduring but little shade.

SWAMP WHITE OAK

Quercus Bicolor

Twice Transplanted.....	3 to 4 ft.	\$ 6.00	\$ 45.00
Twice Transplanted.....	2 to 3 ft.	4.50	35.00

SCARLET OAK

Quercus Coccinea

Once Transplanted.....	4 to 5 ft.	\$ 5.00	\$ 35.00
Once Transplanted.....	3 to 4 ft.	3.75	25.00
Once Transplanted.....	2 to 3 ft.	2.75	18.00

Scarlet Oak: The Oak for fall coloring; scarlet, turning to deep red. A large, spreading tree of good development. Common on dry soils.

BUR OAK

Quercus Macrocarpa

Twice Transplanted.....	4 to 5 ft.	\$ 6.00	\$ 50.00
Twice Transplanted.....	3 to 4 ft.	4.50	35.00
Twice Transplanted.....	2 to 3 ft.	3.00	22.00

Bur Oak: Of beautiful form, resembling somewhat the White Oak. Has a wide-spreading head and dark-green, luxuriant foliage; lower limbs horizontal or drooping. Requires rich, moist soil and plenty of light. Not readily susceptible to insect attacks.

PIN OAK

Quercus Palustris

Three Times Transplanted	9 to 12 ft.	\$15.00	\$125.00
Twice Transplanted.....	6 to 9 ft.	10.00	85.00
Twice Transplanted.....	4 to 6 ft.	6.50	55.00
Twice Transplanted.....	3 to 4 ft.	5.00	40.00

See page 13 for illustration and description of Pin Oak.

RED OAK

Quercus Rubra

Twice Transplanted.....	6 to 8 ft.	\$ 6.00	\$ 45.00	\$400.00
Twice Transplanted.....	4 to 6 ft.	4.50	35.00	325.00
Twice Transplanted.....	3 to 4 ft.	3.00	22.00	200.00
Twice Transplanted.....	2 to 3 ft.	2.00	14.00	125.00

Red Oak: Is becoming the most popular oak for ornamental as well as commercial planting. Its rapid growth and thoroughly satisfactory development, as well as its heavy and its large volume of sound, valuable wood make it so. It has a wide, natural range, growing successfully on the dry, sandy land of Cape Cod and Long Island, while on richer, moister lands it reaches a height of seventy to ninety feet and a diameter of three or four feet.

BLACK OAK

Quercus Velutina

	Height	10	100	1000

Once Transplanted.....	2 to 3 ft.	2.00	10.00

See page 15 for illustration and description of American Elm.

70 Beautiful Trees for \$23.00

Special Combination Offer of the Best Broad-leaved Trees, for Lawn, Avenue and Driveway Planting

10 Norway Maple.....	6 to 9 ft. high
10 Red Maple.....	4 to 6 ft. high
10 Sugar Maple.....	5 to 7 ft. high
10 White Ash.....	5 to 7 ft. high
10 Scarlet Oak.....	4 to 5 ft. high
10 Red Oak.....	4 to 6 ft. high
10 European Linden.....	4 to 6 ft. high

70 trees for only \$23.00

All of these trees have been transplanted one or more times.

All prices in this booklet include careful packing and delivery to the transportation company at Framingham, Mass.

"FULL OF LIFE LITTLE TREES THAT GROW" from Little Tree Farms

SHRUBS AND VINES

BARBERRIES

JAPANESE BARBERRY		Berberis Thunbergii			
		Prices in Lots of			
Height		10	100	1000	
Once Transplanted.....	1 to 1½ ft.	\$1.50	\$10.00	\$85.00	
Once Transplanted.....	8 to 12 in.	1.00	6.00	45.00	
Once Transplanted.....	4 to 8 in.		3.75	25.00	
Seedling.....	1 to 1½ ft.		6.00	40.00	
Seedling.....	8 to 12 in.		4.00	25.00	

Japanese Barberry: A very hardy Japanese plant of dwarf habit. Its spray-like branches with many spines and deep-green foliage make it a beautiful plant in spring and summer. In fall its foliage turns to a very bright red, later dropping and leaving its numerous scarlet-red berries remaining throughout the winter. It is extensively used as a hedge plant, never growing more than three feet high; its compact, drooping habit makes it unnecessary to trim, although it can be readily sheared. Its habit of growing close to the ground makes it an excellent plant for a border planting with other shrubbery. Fruit attractive to birds.

COMMON BARBERRY		Berberis Vulgaris			
Once Transplanted.....	1½ to 2 ft.	\$2.00	\$14.00		
Once Transplanted.....	1 to 1½ ft.	1.25	9.00	\$70.00	
Once Transplanted.....	8 to 12 in.		5.00	40.00	

Common Barberry: A vigorous growing, arching shrub 5 to 7 feet high with an abundance of attractive small leaves, especially in the fall. Golden-yellow flowers in spring and early summer; clusters of bright red berries in autumn. Very hardy, growing in the poorest soils.

EUROPEAN HORNBEAM		Carpinus Betulus			
Seedling.....	2 to 2½ ft.	\$1.50	\$10.00	\$80.00	
Seedling.....	1½ to 2 ft.	1.00	7.00	55.00	

DOGWOODS

GRAY DOGWOOD		Cornus Paniculata			
Once Transplanted.....	1½ to 2 ft.	\$2.00	\$14.00	\$110.00	
Once Transplanted.....	1 to 1½ ft.	1.50	9.00	70.00	

Gray Dogwood: One of our best native shrubs. Free flowering, handsome in bloom, producing clusters of white berries on pink stems in fall. Its numerous gray twigs and stems turn a dark reddish-purple in winter, making it a striking shrub. Grows rapidly in clumps, attaining a height of from 6 to 8 feet.

SHRUBS AND VINES

SPREADING CORNEL

		Cornus Stolonifera			
		Prices in Lots of			
		Height	10	100	1000
Once Transplanted.....	3 to 4 ft.		\$3.00	\$20.00	
Once Transplanted.....	2 to 3 ft.		2.00	15.00	

Spreading Cornel: A rank growing plant with broad spreading habit. Has good foliage and white berries. Its many fine red stems make it attractive throughout the winter. Attains a height of from six to eight feet but should be trimmed back frequently for this produces more stems. An excellent plant to use in mass plantings.

HAZELNUT

		Corylus Americana			
Once Transplanted.....	2 to 3 ft.	\$1.25	\$9.00	\$70.00	
Once Transplanted.....	1 to 2 ft.	1.00	6.00	45.00	

SCARLET HAW

		Crataegus Coccinea			
Seedling.....	2 to 3 ft.	\$1.50	\$10.00	\$75.00	
Seedling.....	1½ to 2 ft.	1.00	7.00	50.00	

WINTER BERRY

		Ilex Verticillata			
Seedling.....	1½ to 2 ft.	\$1.50	\$10.00		
Seedling.....	1 to 1½ ft.	1.00	7.00	\$55.00	

REGEL'S PRIVET

		Ligustrum Regelianum			
Twice Transplanted.....	3 to 3½ ft.	\$3.00	\$20.00	\$170.00	
Once Transplanted.....	3 to 4 ft.	2.50	15.00	140.00	
Once Transplanted.....	2 to 3 ft.	2.00	10.00	85.00	

Regel's Privet: The hardiest of all Privets. A very graceful, horizontal branching shrub, with good foliage. Produces white flowers in spring, which are not showy but very attractive. The small, nodding clusters of flowers produce blue-black berries. Grows to a height of four to six feet. Makes a splendid hedge plant, as well as an ornamental shrub. Habit graceful; not necessary to trim.

WITHE ROD

		Viburnum Cassanoides			
Once Transplanted.....	2 to 3 ft.	\$3.50	\$23.00		
Once Transplanted.....	1½ to 2 ft.	2.00	14.00		
Once Transplanted.....	1 to 1½ ft.	1.50	10.00		

GRAPE VINE

		Vitis Solaris			
Once Transplanted.....	3 to 6 ft.	\$3.00	\$15.00	\$100.00	

Little Tree Farms' Pin Oak, 10 ft. high.
\$1.75 each.
\$1.50 each for 10 or more.

See middle column of page 12 for complete prices of Pin Oak.
Pin Oak develops into a beautiful, cone-shaped tree with bottom limbs slightly drooping. Foliage feathery, sharply pointed, deep green, and a beautiful red in fall. A very fast grower, especially in moist soils. Easily transplanted. A favorite avenue, park and lawn tree.

All prices in this booklet include careful packing and delivery to the transportation company at Framingham, Mass.

EUROPEAN LINDEN

SUGGESTIONS FOR TREE PLANTING

"Order early. Plant promptly and succeed."

IF you are in doubt what to plant, write us what you have in mind and under what conditions you must plant, and we shall be glad to tell you the best trees to use. We will also advise you as to the grade of tree needed; the more times a tree has been transplanted in the nursery, the more vigorous and rapid growing it becomes, and the more adapted to difficult conditions. The process makes fine compact roots and a shapely top.

HEELING IN. Unless unduly delayed in transit our trees will reach you very fresh. Unpack promptly and dip the roots in a thick paste of mud and water. They should then be "heeled in" singly or in thin layers, in a trench, at an angle of thirty or forty degrees. This means covering the roots firmly with soil to shut out the air from them. The heeling-in place should be cool and shady, such as the north side of a building, as all drying winds and sun must be kept from the plants. If the plants arrive somewhat heated, set out immediately if possible; if not, heel them in loosely in a cool cellar, taking pains to give them extra air. It is important not to wet the roots too much, in a damp cellar, as this causes root decay.

THE HOLE. Dig a hole about twice as large as the roots of the tree to be planted; then fill in with the loose soil, just removed, or with better soil, till the hole is only large enough to permit the roots to spread out well. It is best to fill with good loam, as the trees grow faster and have a better color.

PREPARE THE TREE. Cut off with a sharp knife any very long, superfluous roots. In the case of hardwoods with a strong taproot, cut this back about one-third, making a downward slanting cut. Before planting, the roots should be again thoroughly soused in a "puddle" made of rich, fine earth or black muck and water, mixed to the consistency of ordinary paint. There must be no exposure of the roots to the sun or drying winds, as plants are almost surely killed in this way; this is especially true of evergreens. Plants are living things and will die if not given proper care.

PLANTING. Set the tree in the hole about one inch lower than it was planted in the nursery, as shown by the dirt collar; this allows for the settling of the soil. Fill in around the roots with the fine loam, and pack down firmly by tamping with the foot. This must be done very firmly. Add about two inches of surface soil, left loose to act as a mulch. If the soil is dry pour water into the hole, which will pack the soil closer besides watering the plant. Our trees do not need any fertilizer, as they are vigorous plants with much vitality and splendid roots, and can take care of themselves.

Evergreens must never be cut back at the top. Hardwoods may be cut back by a skilled hand if the top overbalances the root, or if the growing conditions are unfavorable.

SPACING. The approximate spacing to secure forest conditions for Pines and Spruces is four, five, or six feet apart both ways. For Oak, Ash, Maple, etc., it is six or seven feet apart both ways. This does not mean measured spacing, or planting in rows, but merely an approximate distance. The trees are planted in a natural scattered way. On dry poor soils the closer spacing is used and on richer soils the wider. We do not advise a wider spacing than six feet even for esthetic forest planting, as the trees grow too large limbs and do not make rapid height. A close spacing is used for windbreaks, screens and borders. We will advise you upon specific inquiry.

Average Number and Spacing of Trees to the Acre.

Feet	Trees	Feet	Trees
4 x 4	2,723	8 x 8	681
5 x 5	1,743	10 x 10	436
6 x 6	1,210	12 x 12	302

Well planted forest trees will need no after care except protection from fire and cattle. Watering large areas is costly and usually unnecessary. In unusually dry weather it may be well to water trees used as "ornamentals", when it can be readily done.

Little Tree Farms' European Linden, 7 ft. high.

\$0.80 each { \$0.60 each for 10 or more.
\$0.45 each for 50 or more.

See third column of page 12 for complete prices of European Linden. The European Linden, small-leaved variety, is a beautiful tree with numerous twigs and dark-green foliage. Is an excellent shade, avenue or lawn tree. Grows well even in dry soils.

AMERICAN ELM

Little Tree Farms' American Elm, 12 ft. high.
Our 8 ft. Elms cost—

\$0.85 each.

\$0.65 each for 10 or more.

See page 12—third column—for complete prices of Elm.

American Elm: One of our well-known and appreciated trees. A tree of large size and graceful habit, growing on many soils but doing best where moisture and food are plentiful. We ship large quantities of these trees to estates where they are used for avenue, lawn and many other purposes. Its foliage is a beautiful yellow in autumn.

The GREAT Farms of LITTLE Trees of LARGE Values and SMALL Prices

FOR YOUR INFORMATION

THE Little Tree Farms ARE AT FRAMINGHAM, MASS.

Framingham is twenty miles west of Boston and twenty-two miles east of Worcester on the Boston & Albany and the New York, New Haven & Hartford Railroads.

THE NURSERY GROUNDS adjoin the Boston & Albany Railroad tracks east of Framingham at one end and can easily be seen from the car windows on the north.

THE NURSERY OFFICE is on Hartford Street, two miles from the Union railroad station. Telephone Framingham 441-W. Mr. Charles C. Bray, the superintendent, will gladly be of service.

BY MOTOR from Boston you follow beautiful, broad Commonwealth Avenue through Brookline and Newton to Washington Street, then southeast through Wellesley and Natick to Boden Lane, which leads along and into the nursery.

BY ELECTRIC one takes the Boston & Worcester line car to Framingham, getting off at Hartford Street to walk ten minutes to the office. Or take the Newton, Wellesley, Natick line and get off at Boden Lane.

PLEASE ORDER EARLY, so we can reserve the stock and ship when you want it.

PLEASE GIVE SHIPPING INSTRUCTIONS:

1. To what address shall we ship?
 2. Shall we forward by freight? { Boston & Albany R.R. or by N.Y., N.H. & H. R.R.
 3. Or by express? { Adams American
 4. What date shall we ship?
- In the absence of these instructions we shall use our best judgment.

WE ADVISE EXPRESS SHIPMENTS, for they arrive in good condition. The rate on trees is 25% less than for general merchandise. Large freight shipments we recommend sending in bulk in car lots, thus saving packing charges, and making sure the trees shall arrive promptly in good condition.

We deliver free to transportation companies, and our responsibility ceases upon such delivery. Shipments travel at the customers' risk. We do not pay transportation charges.

RATES. We sell 500 or more trees of the same size and species at the thousand rate; between 50 and 500 at the hundred rate; less than 50 at the ten rate.

TERMS OF PAYMENT are cash with order unless otherwise agreed upon. Checks or drafts please make on Boston or New York. Post-office and express money orders should be made on Boston. Cash in registered mail only.

PACKING. The prices in this booklet include careful packing.

THE SHIPPING SEASON BEGINS

Fall—About the middle of August for evergreens. The first of October for hardwoods, continuing until the ground freezes.

Spring—As soon as the frost leaves the ground (about the middle of March), continuing until June.

The planting season is determined not by the state of vegetation where the planting is to be done, but by the condition of the trees to be planted. So long as they are dormant they may safely be transplanted. Plants can be shipped to southern localities later than would be supposed because vegetation in Massachusetts is dormant later than further south.

WE GUARANTEE TO SUPPLY HEALTHY, HARDY PLANTS

→ DUG
PACKED
SHIPPED **FRESH**

WE SHIP TREES

1. Dug upon order, not cellared nor "heeled in" stock.
2. Graded carefully and generously, usually giving a few extra for good measure. To avoid confusion please follow our gradings in ordering.
3. Bundled, tied and carefully labeled.
4. Packed at once in the moist air of a modern packing cellar, and packed right according to species, time of year and the distance to travel.
5. Delivered promptly to transportation companies.

WARRANTY AND REPLACEMENT

We use great care to follow instructions and we intend invariably to send out only first-class plants and seeds, true to label, well packed, addressed as directed and delivered to transportation companies.

We gladly rectify errors if claim is made at once on receipt of goods, but we cannot be liable for more than the purchase price. Our prices are not made to cover a possible second shipment. They are the lowest statement of value of one shipment of first-class trees. It is humanly impossible to guarantee the growth of plants since so many causes can injure or kill them. Claim for delay en route should be taken up with the transportation company.

WE IMPORT NOTHING, thereby avoiding unacclimatized, devitalized, dry or mouldy stock, and also the insect and fungoid infection that may be attached to imported stock.

INSPECTION CERTIFICATE of the United States Department of Agriculture and the State of Massachusetts Entomological Department accompany each shipment and assure healthy, clean stock.
